Our History

As a child I was always having troubles with my respiratory and immune system. To make matters worse I was also severely injured in an accident with a horse and was in a comma for a time. The attending emergency ward doctor's analysis was that I would be paralyzed for life or would die within a short time.

I, as a Christian, give God the glory for my healing. Today I am walking and have not lost any brain function. I did however, suffer excruciating headaches and pain throughout my body. I began exploring CranioSacral Therapy, other modalities of Therapy, Chiropractic, Herbs and Supplementation. I give thanks to those for my great health today.

After retiring, my father became interested in supplements and other forms of health care including Chiropractic. At the time I was a young adult and was working at a Rehabilitation and Nursing Facility as a Psychiatric/Nursing Attendant. While working here, I injured my back in an accident. After traction in the hospital I visited my father's Doctor of Chiropractic. This opened up a new world of healing for me. It is also the place I met my husband, Dr. Gregg F. Brady.

We are happy to say we have been married for over 30 years and have worked side by side in our office.
